

# COASTER 600

NAVIGATE WITH STYLE AND SAFETY

**JOKER  
BOAT**  
CREATE YOUR UNIQUENESS

**fun without  
a doubt**

Born to follow you everywhere, trailerable, stable and easy to drive. Once in the water the COASTER series inflatables will amaze you with their performance. Essential, concrete and capable of performances at the top of the category; they'll amaze you even in the most difficult conditions.

# AT SEA WITH YOU

## For leisure

Great for a day at the beach with family and friends. Its manageable size and its comfortable spaces, facilitate all movement. Easy to moor, it has enough space to store various recreational objects like fins and masks or inflatables. Thanks to the safety of its dinette, the space in the cockpit and a comfortable and safe area to ascent at the stern, this boat is optimal for navigation even with the little ones.

## As a tender

Small and handy to lift with a crane or to tow. The Coaster 600 is ideal for transporting up to 10 people. On the Coaster 600 water splashes are not a problem to worry about and like all Joker Boats it is customisable both in terms of livery and accessories on board to give it more style and satisfy any taste.

## For renting

The Coaster 600 is a “worry-free” boat. The lateral passage on the left ensures a useful and fast way to go from bow to stern, move freely and facilitate the mooring operations while maintaining a safe environment for children thanks to the height of safety of the tubes and handrails placed in strategic points . It can be rented to customers without a nautical license considering that it does not require the installation of large powers and is easy to handle even for the most inexperienced.

## boat equipment

The bow is characterised by a **large and extensible sunbathing area** thanks to a cushion with additional wooden extension suitable for two people.

Underneath the pillows of the bow sunbathing area, **two lockers**: one for the anchor and one for general storage, characterise the deck.

At the far bow a **fiberglass nose** with stainless steel cleats for fixing the mooring lines provides also an anti-slip platform for ascending/descending. **Handles** on the tubes guarantee greater safety during navigation.

In front of the console, **a seat with a comfortable cushion** and a backrest doubles as a bow seat or, with an additional cushion and wood extension, fuses to become a large sunbathing space.

**The transom and bilge cockpit** are accessible through an entrance in the lateral part of the stern wall. The ascent space from the aft ladder is wide enough to access easily. Two side cleats for mooring lines and aft eyebolts are installed on the transom for lifting the boat. Two extra fiberglass platforms can be installed on the transom to enlarge the boat further.

The **driver's seat** is tall and spacious. Two people can sit comfortably and it is high enough to give visibility to the captain even when seated.

## boat equipment

The seat opens towards the console, providing an additional storage area.

The **stern cockpit** has a comfortable shape for navigation thanks to the three-seat dinette which is divided into two fixed parts and one mobile. The fixed part can accommodate two people and is equipped with a locker underneath for stowage of various materials. The removable part of the dinette instead, consists of a side extension to allow a third person to sit down.

Without the extension, **a comfortable passage** can be exploited through the aft door. Two stainless steel handrails on the side bulkheads in fiberglass of the dinette, provide additional security and grip during navigation.

Raising the stern seat leads to another **large locker** ideal for stowage of various materials.

**The console** has two inspection hatches for convenient and quick access in case of maintenance of the on-board instruments.

## equipment and technical data

### Standard equipment

Console with windshield
Inflator
Inox Handrail
Manual + CE Certificate

Mechanical steering
Oar
Repairing Kit
Sundeck Cushions + Driver's Seat

### Technical specifications

Length all out:	6,03 m
Max beam (inflated):	2,50 m
Deck length:	5,08 m
Beam:	1,32 m
Tubes diameter:	58 cm
Tubes pressure:	0,30 atm
Dry weight:	480 kg
Air compartments:	N.6
Max people on board:	N.10
Max motor power:	118 Kw (160 HP)
Motor shaft length:	L x 1
Hull construction material:	Fiberglass
Self draining:	Yes
Storage areas:	N.6
Project category:	C
Trailerable:	inflated

### Optional equipment

Air pressure gauge
Bimini top on rollbar
Boat cover
Console cover
Fuel tank Lt. 110
Hydraulic steering e utilities panel (various functions)
Inox rollbar Ø 40 mm (no lights)
Ladder
Pair of aft fiberglass platforms with ladder
Sundeck extension with cushion
Teak deck
Water tank Lt. 50

# colors chart guide

## Hypalon texture

## Cushions materials

## Rope or handles

## Fiberglass

## Rubber

## Teak floor

## Bimini

Bimini colors are determined according to the cushion's colors.
