

COASTER 650

THE MOST SOLD SINCE 1980's

**JOKER
BOAT**
CREATE YOUR UNIQUENESS

**fun without
a doubt**

Born to follow you everywhere, trailerable, stable and easy to drive. Once in the water the COASTER series inflatables will amaze you with their performance. Essential, concrete and capable of performances at the top of the category; they'll amaze you even in the most difficult conditions.

AT SEA WITH YOU

For leisure

The Coaster 650 is a spectacular leisure boat. Its legendary hull and functional and spacious deck guarantee fun and comfort for all people on board. The console has enough space for any type of on-board instrumentation. The stern and the bow give ample space to sunbathing and storage of materials. With the installation of a comfortable bimini, you will also find the best solution for a relaxing day in the middle of the sea.

For fishing

The Coaster 650 has proved, over the years, one of the choices of professional and nonprofessional fishermen. Thanks to this success Joker Boat has decided to launch a model based on its hull with a deck entirely dedicated to fishing: the Coaster 650 Barracuda.

For the work

Its great manoeuvrability, the design of the hull and the deck space, transform the image of the Coaster 650 from a normal pleasure boat in a work boat for all uses. As regards the OPEN version, it is possible to request it in different configurations: for the transport of people, for port management, for the transport of objects and much more.

boat equipment

The bow is characterised by a **long sundeck** composed of two cushions, one of which is slightly raised to facilitate the ascent from the nose.

Below are **two peaks** that exploit the full depth of the hull, one for stowage of the anchor and chain and the other for various materials.

A large bow nose with two side bollards and a stainless steel anchor housing is designed for the installation of an electric windlass.

As in all Coaster, **the console is positioned laterally** on the right side of the boat but with a central guide, leaves ample space on the left side allowing a wider and easier passage from stern to bow. The console is designed to allow the installation of one or more screens.

The windshield with a stainless steel handrail protects and give security to the captain and his guests.

A **compartment in teak** provides a safe place to protect small objects. An easy inspection is on the side of the console for maintenance of the on-board instrumentation.

boat equipment

The hull of the Coaster 650 is much appreciated for its tightness and softness that make it a flexible boat for both fun and work. Pleasant to maneuver even with impervious sea and with engines ranging from 100HP (minimum) to 200HP. The extreme stern allows you to install **two additional fiberglass panels** with teak inserts and is equipped with lifting hooks installed on the transom. A small locker provides additional storage space for ropes and fenders.

With its stainless steel folding backrest covered by a padded cushion, **the captain's seat** turns into a large sunbathing area, optimising the cockpit to the maximum.

Under the seat **a locker for stowage of various materials** complements the stern. The back cushion is divided into two parts: the main cushion (fixed) and a side cushion (removable) which guarantees a comfortable passage without walking on the cushions.

The extreme stern has a compartment suitable for stowage of mooring lines or of the stern anchor.

equipment and technical data

Standard equipment

Console with windshield

Fuel tank Lt. 135

Hydraulic steering

Inflator

Large bow nose for electric windlass

Oar

Repairing kit

Sunbathing cushions + Driver's seat

Stainless steel handrail

User's Manual + CE Certification

Utilities panel (various functions)

Technical specifications

Length all out: 6,57 m

Max beam (inflated): 2,48 m

Deck length: 5,60 m

Beam: 1,41 m

Tubes diameter: 55 cm

Tubes pressure: 0,30 atm

Dry weight: 500 kg

Air compartments: N.6

Max people on board: N.16

Max motor power: 148 Kw (200 HP)

Motor shaft length: L x 1

Hull construction material: Fiberglass

Self draining: Yes

Storage areas: N.6

Project category: C

Trailerable: inflated

Optional equipment

Air pressure gauge

Aft fiberglass platforms + ladder

Bimini top

Boat cover

Console cover

Electric windlass with anchor and chain

Fridge Lt. 35

Ladder

Rollbar INOX Ø 40 mm (no lights)

Sundeck extension + cushion

Teak deck

Water tank Lt. 50

colors chart guide

Hypalon texture

Cushions materials

Rope or handles

Fiberglass

Rubber

Teak floor

Bimini

Bimini colors are determined according to the cushion's colors.
